

Solar Bonus Scheme Review Announced

24 Aug 2010

The NSW Government has today announced a review of its Solar Bonus Scheme, as the 50 MW trigger for the review has been reached.

The Minister has stated that any changes to the program as a result of the review would not be applied retrospectively. This means no customers who have already signed up to the scheme will be affected. Customers can continue to apply for and receive the current feed-in tariff until (and if) any legislative changes are made as a result of the review.

Public submissions must be received before 30 September, with the review to be tabled towards the end of the next session of Parliament.

The CEC has prepared a submission for this process and will be circulating it to the Solar PV Directorate shortly for comments.

More information can be found on the website for the Solar Bonus Scheme [here](#), or by contacting the NSW Department of Industry and Investment on 1300 136 888. Submissions can be emailed to solarbonus.review@industry.nsw.gov.au.

Yours sincerely

Russell Marsh
Policy Director
Clean Energy Council
